NINE LAKE

T. 9. R. 3., AROOSTOOK CO., MAINE

AREA 120 ACRES

# NUMBER NINE LAKE

T9 R3, Aroostook County  
U.S.G.S. Number Nine Lake, Me (7 1/2')

## Fishes

Brook trout

Minnnows  
Redbelly dace  
Creek chub

## Physical Characteristics

Area - 120 acres

Maximum depth - 10 feet

Principal fishery: Brook trout

Temperatures:

Surface - 64<sup>0</sup>F

8 feet - 62<sup>0</sup>F

Number Nine Lake was chemically reclaimed in 1956 to remove competing species and permit intensive management for brook trout. A small dam on the outlet prohibits the access of undesirable fish species to the lake and maintains a desirable water level.

The small inlet stream provides some trout spawning and nursery area and should be maintained free of obstructions. Along with natural reproduction the brook trout population is supplemented with annual stockings of brook trout. Considerable spring seepage provides refuge for trout during warm summer months.

The Number Nine Sportsman's Association maintains an IF&W owned boat landing and picnic area. The boat landing is improved gravel and suitable for small trailered crafts.

Access to the lake is via private gravel roads built and maintained for forest management purposes.

Surveyed - September 1954
